

CMC di Ravenna South Africa Branch – G4 Joint Venture

Ref: GIL/GJV/GM

Date: 15-June-2010

Attention to: Whom it may concern

**Project: National Route 12 Section 19: Gillooly's Interchange to Rietfontein (R21) Interchange
Contract N. 012-190-2000/3
Maintenance and Rehabilitation**

Subject: Recommendation letter

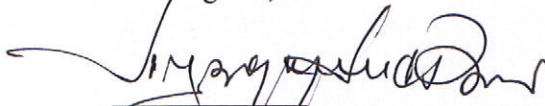

LPM Reinforcing Steel (Pty) Ltd has been involved with CMC, as our sub-contractor, on the construction of the National Route 12 Section 19: Gillooly's Interchange to Rietfontein (R21) Interchange – improvement & rehabilitation, since January 2009.

They are performing an overall project management function as far as reinforcing steel is concerned. This entails management and performance of supply, cut, bend, delivery and installation of reinforcing steel requirements. They also perform a total commercial and accounting function where claims and continuous tracking of documentation and tonnage is concerned.

We have found them to be a very efficient partner, who is dedicated to promptly complete any and all tasks allocated to them. We have also found them to be prepared to go the "extra mile" when required. They have been instrumental in ensuring quick and effective production despite a very challenging program.

We can highly recommend LPM for employment on any scale of project. LPM would be a great asset to any project based on our experiences.

With regards,

Aleksandar Puzderliski
